

RASPBERRY PI NET PREAMBLE

Good evening everybody and I would like to welcome you all to this edition of the Raspberry Pi Net. This is W2JLD and my name is John. I am located in Rochester New York and I will be your net control today. This net meets every Sunday at 2pm Pacific / 3pm Mountain / 4pm Central / 5pm Eastern / 2100 UTC on the ***ROC-HAM* EchoLink Conference node number 531091** and also on **AllStar nodes 2585, 47918, 47620, 53130 and 53131**. For more info check out <https://Roc-Ham.net>. Also we are on the **FreeSTAR Multimode Network**. Please go to <https://freestar.network> and click on how to connect for all the different ways to connect as there are far too many to announce here.

This is a directed net and all calls will go through net control. When checking into this net, please give me your call sign slowly and in phonetics and twice as that will help me get it correct the first time.

The purpose of this net is to discuss Raspberry-Pi's both hardware and software. And the many uses, not just limited to Amateur Radio use. We talk about the raspberry-pi, Linux, Supermon, AllStar, programming, writing scripts and a lot more.

This net is an opportunity to ask questions, get answers and most of all have fun.

I would like to thank all the EchoLink conference and node owners who are connected for today's net.

We also utilize the program called NETLOGGER. If you do not have NETLOGGER, you can download it from NETLOGGER.ORG. It is free and it is available for the Linux, Mac and the Windows Operating Systems so that you can follow along with the Net and also make use of the AIM window which is the Almost Instant Messenger chat box also known as the Blue Screen.

So let's get this net started.

CLOSING OF THE NET

This is W2JLD and my name is John. I am located in Rochester New York and I would like to thank you all for joining us today on this Sunday's Raspberry-Pi net. This net meets every Sunday at 2pm Pacific / 3pm Mountain / 4pm Central / 5pm Eastern / 2100 UTC on the ***ROC-HAM* EchoLink Conference node 531091** and on AllStar nodes 2585, 47918, 47620, 53130 and 53131. Check out the <https://Roc-Ham.net>. This net is also carried by our friends on the FreeSTAR Multimode Network. **More information on the FreeSTAR Multimode Network is available at <https://freestar.network>.**

We also would like to thank each and every one of you who took time out of your day to join us. Without you this net would not be possible. Also I want to thank Dave/GW8SZL for all the work he does behind the scenes as well.

It has been a pleasure to be your host this evening and please join us every Sunday for the raspberry-pi net. 73
